Survey Says...

- What year are you?
- Who has used a computer regularly?
- Who has used the Internet regularly?
- Who has made a web page?
- Who has written a program?
- Why are you taking this course?

What is Computer Science?

“Computer Science is no more about computers than astronomy is about telescopes.”

--Edsger Dijkstra

- CS = Complexity Science

- Microsoft VP of Research
- Formerly at NSF, CMU

When people talk about the smart grid, smart vehicles, and smart buildings — what makes them ‘*smart*’?

Computer science.

When people talk about personalized medicine and personalized learning, how do you think personalization is possible?

Computer science.

We’re not there yet, but the next generation of computer scientists can help us realize these visions — with immeasurable *benefits* to *society* and the *economy*.

CS == Complexity Science or the Study of Complexity

- How can it be done?
 - Based on **information**
 - Managing, manipulating data
 - Possible algorithms
- How well can it be done?
 - Most **efficient** algorithm in terms of time and/or space
- Can it be done at all?
 - Often, proof is a program--an implementation of the above

The Ancient Graffiti Project Search Engine

A digital resource for studying the graffiti of Herculaneum and Pompeii

Welcome to The Ancient Graffiti Project, a digital resource for locating and studying graffiti of the early Roman empire from the cities of Pompeii and Herculaneum. More than 500 ancient graffiti are now available here, ca. 300 from Herculaneum and another 200 from Pompeii (from the Lupanar, Insula I.8, and other locations). Entries for the Herculaneum graffiti now include photographs from our fieldwork in 2016.

Special acknowledgements to Eric Poehler for the map of Pompeii and the creators of ImageMapster for the highlighting map feature.
