

Objectives

- Eclipse debugger
- Preparation for Preliminary Implementation Demo on Monday

Nov 6, 2020

Sprenkle - CSCI209

1

1

Review

- What is the decorator design pattern?
 - When is it useful?
 - How is it implemented?
- What is our workflow in git?
 - Even more important with team projects

Review: Mocha's Implementation

```

public class Mocha extends CondimentDecorator {
    private Beverage beverage;

    public Mocha(Beverage beverage) {
        this.beverage = beverage;
    }

    public String getDescription() {
        return beverage.getDescription() + ", Mocha";
    }

    public double cost() {
        return .20 + beverage.cost();
    }
}
  
```

Handles part it knows about,
Delegates rest to Beverage;
 Example of OCP

ECLIPSE DEBUGGER

Nov 6, 2020

Sprenkle - CSCI209

5

5

Eclipse Debugger

1. Set breakpoint
 - Near and BEFORE point of failure
2. Run program in debug mode
 1. Program pauses when it hits a breakpoint
3. Inspect variables
4. Step through program, inspecting variables
 - Step into, over, and return

Nov 6, 2020

6

6

Commands

- **Step Into**
 - Executes the current line
 - If the current line is a method call, the debugger steps into the method's code
- **Step Over**
 - Executes a method without stepping into it in the debugger
- **Step Return**
 - Steps out to the *caller* of the currently executing method
 - Finishes the execution of the current method and returns to the caller of this method

7

7

Testing Code

- Main methods in
 - `picasso.Main.java`
 - `picasso.parser.Tokenizer.java`
 - `test.ParserTestDriver`

Smooth seas do not make for skillful sailors

PREPARING FOR MONDAY

Nov 6, 2020

Sprenkle - CSCI209

9

9

Plan for Monday: Preliminary Functionality

- All virtual class
- 10-minute demos via Zoom
 - One member of your team will share their screen
 - Demo the required functionality
 - Then, focus on the design of the code
 - What did you do to make the functionality?
 - How will you add reading the expression from a file?
 - How will you add other components?
 - Thoughts on extensions
 - Questions/concerns

http://cs.wlu.edu/~sprenkle/cs209/projects/final_proj.php#deliverables

10

Start Thinking About

- Reporting errors to users
 - Currently: in the output but users aren't going to see that
 - Helpful errors → translated for users
- Opening a file that contains an expression
- Assignment statement
- Functions with multiple arguments, image names
- Extensions

11

11

Team Demo Order on Monday

```
>>> teams = [ "Blocks", "Duplo", "Jigsaw", "Link", "Mega" ]
>>> import random
>>> random.shuffle(teams)
>>> teams
['Jigsaw', 'Link', 'Mega', 'Duplo', 'Blocks']
```

[3 min course announcements]

- 10:03: Jigsaw Puzzles
- 10:14: Linkimals
- 10:25: MegaBlocs
- 10:36: Duplos
- 10:47: Building Blocks [test breakout rooms]

Group Work and Questions

Nov 6, 2020

Sprenkle - CSCI209

13

13

Secondary Goals

- You're going to figure out that your final design isn't perfect—maybe not even good!
 - Fix more critical and/or smaller things
 - Refactoring!
 - Note larger things
 - analysis/post-mortem due at end of finals week

Good judgment comes from experience.
How do you get experience?
Bad judgment works every time.
