

Peer Evaluation of Group Members' Performance

Your Name:

Division of Labor. List the name of each group member, including yourself, and the tasks that each person performed. If you worked side by side on the whole presentation/demo, then say that. Otherwise, include preparation, organization, creating slides, downloading/installing the tool, creating a demo (subject applications), managing the group's efforts, ... tasks in your list of tasks.

Then, indicate the percent (out of 100%) of the project work, including all tasks above, that you believe each team member performed. For a team of 2 in which each person worked equally, each person would be assigned 50%.
